TegoFruit&Veg
REFRESHINGLY CREATIVE

WIDE COLOUR SPECTRUM

Thanks to our wide selection of wood finishes, you'll be sure to find the perfect colour and wood finish for your fruit and vegetable shelving. To create the perfect combination, we can even paint the metal elements to match!

MOVING WITH THE TIMES

Fruit and vegetable shelving is an indispensable feature of any and every supermarket.

Thanks to ongoing advances in our R&D, we're able to offer fruit and vegetable shelving that is perfectly tailored to your product range.

TegoFruit&Veg

We personally design and manufacture our fruit and vegetable shelving and pay particular attention to easy assembly. Our metal and wooden elements (or combinations of both!) are designed to be exceptionally durable.

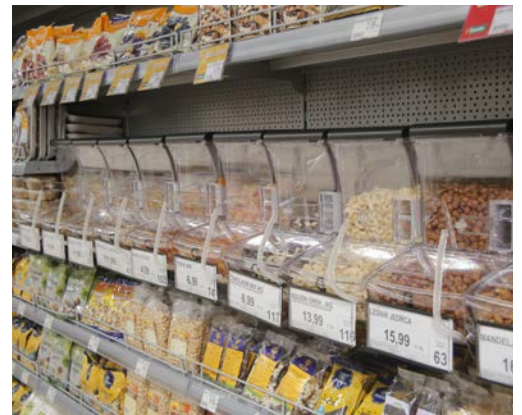

Most of our fruit and veg shelves are fitted with wheels – with and without brakes – to ensure they can be moved around easily. The shelves in the wall-mounted units can be adjusted to the desired height. On request, we'll be happy to incorporate fixtures that allow you to add price tags, accessories, lighting or holders for disposable gloves.

- Shelves can be adjusted quickly and easily
- Easy and intuitive to use
- Clear, transparent presentation
- Easy handling for customers and staff

HIGH-QUALITY PRESENTATION

By using various different elements for displaying fruit and veg, we can show your products to their best advantage and make your customers' mouths water!

ACCESSORIES

When choosing your fruit and veg display, we'll talk to you first in detail about your requirements to make sure you get all the features you need.

Gravity dispensers for unpackaged foods such as dried fruits and nuts allow your customers to freely select their desired quantity.

■ Zuverlässigkeit zählt.

■ Reliability matters.
